---

## PROFILE

I am a qualified and professional MERN and Python developer with over Three years of experience in full-stack development. My objective is to work for a reputed organization where I can apply my knowledge to help meet organizational goals while enhancing my professional and technical skill set.

---

## WORK EXPERIENCE

### MERN STACK DEVELOPER

**Webbuggs** | <https://www.webbuggs.com/>

*January 2025 - Present*

I have been working with Webbuggs as a Mern Stack Developer and Python Prompt Engineer. During this period, I have worked on Mern Stack Projects and Python Prompts Engineering Projects for AI modal Training.

### MERN STACK DEVELOPER

**Daira Engineering** | <https://dairaengineering.com/>

*October 2023 - January 2025*

- I have been working with Daira Engineering as a MERN stack developer since October 2023. During this period, I have worked on several minor and major projects.
- My experience with Next.js and other frontend technologies further complements my web development expertise, enabling me to handle diverse development tasks efficiently.

### MERN STACK DEVELOPER

**MicroBit Studios** | <http://microbit.pk/>

*January 2023 - September 2023*

- Contributed to web development tasks, focusing on integrating REST APIs and optimizing web performance.

## EDUCATION

### University of Sahiwal

2019 - 2023

BS Computer Science

I have worked on multiple academic projects during my 4 years of BSCS education

My major subjects include C++ , Data Structures and Algorithms, Web Programming, Java Programming, and Databases

## SKILLS

[HTML](#) [CSS](#) [JavaScript](#) [Bootstrap](#) [React.js](#) [Next.js](#) [Node.js](#)

[Express.js](#) [MySQL](#) [MongoDB](#) [RESTful APIs](#) [Socket](#) [Google APIs](#)

## LIBRARIES

### Frontend Libraries:

[React Router](#) [Material UI](#) [React Bootstrap](#) [Core UI](#) [MDB](#) [Redux & Redux Saga](#)

[React Leaflet](#) [Chart.js](#) [Recharts](#) [Axios](#) [Socket.IO-Client](#)

### Backend Libraries:

[Express.js](#) [Nodemailer](#) [Sequelize](#) [Mongoose](#) [Socket.IO](#) [Bcrypt.js](#) [JSON Web Token \(JWT\)](#) [CORS](#) [Helmet](#) [PM2](#) [Stripe API \(G-Pay & Apple Pay\)](#)

### Integrated Third-party APIs

[Mailchimp](#) [OpenAI](#) [Facebook Meta](#) [TikTok Meta](#) [Stripe API](#) [Mapbox](#) [Google](#)

[Maps API](#) [Google Developer APIs](#) [Play Store APIs](#) [Gyminy API](#) [AssemblyAI](#)

[MailerSend APIs](#)

## PORTFOLIO

### Live Projects

#### Daira Engineering & Technology

<https://minimis.life>

- Implemented engaging animations to enhance the user interface, creating a dynamic and visually appealing website.
- Developed a fully responsive landing page that adapts seamlessly across devices, ensuring a consistent user experience on desktops, tablets, and smartphones.
- Integrated backend features like MailChimp email Integration using Node.js, Express, enabling efficient data handling, form submissions, and user interactions.

#### Daira Engineering & Technology

<https://app.minimis.life/>

- Integrated backend features like MailChimp email Integration, Payment Integration using Node.js, Express, enabling efficient data handling, form submissions, and user interactions.
- Implemented engaging animations to enhance the user interface, creating a dynamic and visually appealing website.
- Developed a fully responsive landing page that adapts seamlessly across devices, ensuring a consistent user experience on desktops, tablets, and smartphones.

## Daira Engineering & Technology

<https://play.google.com/store/apps/details?id=life.minimis.launcher&hl=en&pli=1>

- Responsible for the entire backend development of the MinimIS Launcher.
- Developed and integrated RESTful APIs to ensure smooth communication between frontend and backend.
- Handled database design and management, ensuring data security and performance.
- i have integrate in this project "Live Chat System , Payment Integration and all backend Api's.

## Daira Engineering & Technology

### Admin Dashboard of MinimIS Launcher

- Led the design and implementation of the admin dashboard for the MinimIS Launcher, providing an intuitive interface for managing application features.
- Integrated dynamic data visualization tools to display key metrics and analytics for user management and system monitoring.
- Connected the dashboard with backend services to enable real-time data updates and secure interactions.
- Ensured the dashboard is fully responsive, delivering a seamless user experience across all devices.

### Working:

### Webbuggs

### Offline Website & and Python Prompts Engineering

- Working With Offline websites and Prompts Engineering for AI Modal Training.
- Developed offline-first web solutions, ensuring seamless functionality without internet connectivity.
- Engineered Python-based prompt systems to enhance automation, AI interactions, and data processing efficiency. Focused on optimizing performance, usability, and reliability for diverse applications.
